DIGITUS® Portable 70W Party Speaker with Bluetooth

DA-10270

Massive party fun with great performance!

Don‘t make the mistake to think that this is just yet another Bluetooth speaker. Because the DA-10270 is BIG, it‘s HEAVY and it‘s damn LOUD! Impressive 70 watts RMS deliver excellent sound quality and turn any place immediately into a party location. Thanks to the two included wireless microphones you may also sing or speak and nobody will be able to ignore you. If you want to impress the people around you even more, then simply connect your electric guitar to the built-in amplifier and rock the house! The integrated battery lasts for about 4 hours at maximum volume, you too?

Of course you don‘t have to use the Bluetooth function, there is also a line-in jack. In addition, a SD card or USB drive can be used as a music source. Thanks to the line-out jack, you can even connect a second loudspeaker - so order two of our party monsters for even more fun! If you are strong enough to carry them. But don‘t worry, we make it easy for you: With the help of the built-in wheels and the handle you can just drag the 30 kg along behind you.

Features

- Weather-resistant plastic housing
- Active speaker: 15“ (380mm) chassis with bass reflex design + 34mm tweeter
